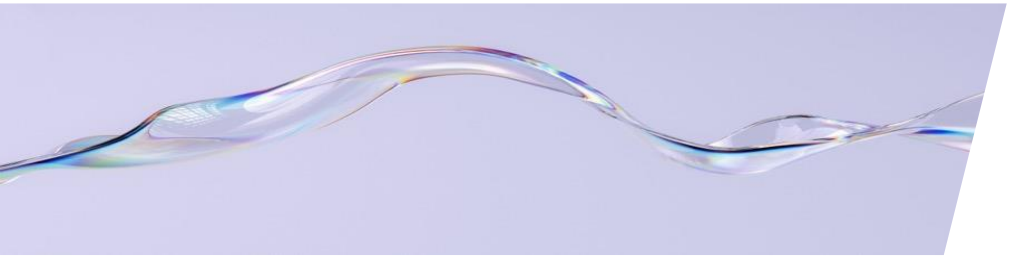
PRESS RELEASE

Join allnex at Pack Expo International 2026 and explore Next-Generation Packaging



RELEASE DATE:
Alpharetta, Georgia / October 7, 2026

- Discover how allnex technologies are creating the next generation of sustainable packaging.
- Learn how oxygen barrier solutions are designed to support flexible packaging structures and evolving packaging requirements.
- Connect allnex experts on booth W-40030 in the Package Printing Pavilion

allnex will participate at Pack Expo International 2026, one of the industry's leading events for packaging and processing innovation taking place on October 18-21 at McCormick Place in Chicago, Illinois, USA.

The allnex team will welcome packaging professionals at Booth W-40030 in the Package Printing Pavilion and will be ready to share how our technologies are building the future for next-generation of flexible packaging.

Packaging is something we interact with every day, often without giving it much thought. Whether it's a coffee pouch that helps preserve freshness or eye-catching graphics that make a product stand out on the shelf, the performance of packaging has a direct impact on both consumers and brands.

At Pack Expo, we'll be highlighting the technologies behind these everyday experiences. From oxygen barrier coatings to the latest developments in inkjet and energy-curable technologies, allnex solutions help customers achieve the performance they are looking for.

One of the highlights of the exhibition will be **DAOTAN® TW 8880**, our oxygen barrier technology. It offers brand owners, converters, and packaging manufacturers a practical pathway to meet increasing sustainability expectations while maintaining product protection.

In addition, visitors will have the opportunity to explore allnex's broad portfolio for packaging and package graphics, including water-based, energy-curable, and digital printing technologies. These solutions support a wide range of applications, from protective coatings to resin technologies that enable durable, high-quality print results.

allnex is a leading global manufacturer and solution provider of coating resins and additives for industrial and composite markets. With a 75-year heritage, over €2 billion in revenue and 3,870 employees worldwide, our focus is to create innovative chemistry for all nex>t generations, driven by the needs of our customers in a fast-changing world. We do this with sales, research and production network spanning 35 countries, a workforce representing over 50 nations with an all-in dedication to innovation, sustainability and reliable partnership.

allnex supports customers to enhance their product and service solutions with a wide range of chemistries and innovative products, including the sustainable ECOWISE™ offerings. As part of GC, our main markets are Mobility & Transportation, Packaging & Consumer Goods and Construction & Infrastructure.

INNOVATIVE CHEMISTRY FOR ALL NEX›T GENERATIONS

"The packaging industry is increasingly looking for solutions that deliver both high performance and sustainability," said **Andreas Jansen**, Market Segment Manager Packaging. *"At Pack Expo 2026, we'll be showing how our technologies help customers move forward with confidence, creating packaging solutions that meet today's demands while supporting future goals."*

Whether you're looking to improve package performance, enhance recyclability, or explore new printing and coating technologies, we invite you to stop by Booth W-40030 and speak with our experts about your specific needs.

We look forward to meeting you in Chicago.
