

allnex Brings Advanced Coatings and Additive Innovations to LACS 2026

RELEASE DATE:

Frankfurt am Main / July 13, 2026

- allnex to showcase a wide range of coatings and additives solutions at the biggest paint, coatings and ink exhibition in Latin America – LACS 2026
- Pamila De Melo from allnex team to give a technical presentation on ADDITOL® XL 6592, providing insights into its performance and application benefits: stronger color, better opacity, improved storage stability, and easier manufacturing

allnex announces its participation in the leading international exhibition for suppliers to the paints, inks, and coatings industry in Latin America – the Latin American Coatings Show 2026. The event will be held from July 21–23 at Centro Banamex in Mexico City, Mexico. Visitors are invited to join us at booth 10-15 and explore a wide range of allnex technologies and solutions, developed to help customers address challenges across automotive, wood, architectural, and industrial markets.

At LACS 2026, allnex will showcase technologies and solutions developed for various sectors, including automotive (VR and OEM), wood, architectural and industrial markets:

- **Fast Cure Technology:** Our high-performance acrylic polymer line optimizes 2K isocyanate conversion through advanced chemistry. It achieves outstanding early hardness and initial chemical resistance while offering the distinct advantage of an exceptionally long pot life.
- **ECOWISE™ CHOICE Portfolio:** A product line engineered to meet the sustainability needs of the industrial market, reducing energy consumption and lowering the carbon footprint.
- **UV/EB, Powder, and Waterborne Resin Innovation:** Cutting-edge technologies offering zero or ultra-low volatile organic compounds (VOCs), complying with the strictest global environmental regulations.
- **Specialty ADDITOL® and MODAFLOW® Additives:** Critical components essential to transform coating properties, optimizing flow, leveling, pigment dispersion, surface defect control, and scratch resistance in formulations.

Discover the Power of Highly Effective Dispersants: On July 22, Pamila De Melo will give a **technical presentation on ADDITOL® XL 6592** providing insights into its performance and application benefits. It enables stronger color, better opacity, improved storage stability, and easier manufacturing – while giving formulators one versatile dispersant that can replace multiple products across waterborne, solventborne, and 100% solids systems. The presentation will take place from 5:00 PM to 5:50 PM in the Niquel Room.

allnex is a leading global manufacturer of industrial coating resins and additives. With a 75-year heritage, over €2.2 billion in revenue and 4,000 employees worldwide, our focus is to create innovative chemistry for all nex>t generations, driven by the needs of our customers and a swiftly changing world. We do this with a research and production network spanning 35 countries, a workforce representing over 50 nations and an all-in dedication to innovation, sustainability and reliable partnership.

Beyond a wide range of industry classics, allnex is known for its leading role in new chemistries such as UV-curable and low-bake resins, as well as for its sustainable ECOWISE™ line. As part of PTT Global, our main markets are Mobility and Transportation, Packaging and Consumer Goods and Construction & Infrastructure. In addition to tailor-made solutions for coatings, we offer an advanced portfolio of resins for composites.

ADDITOL® XL 6592 is not the only additive in the spotlight at LACS 2026. Visitors to the allnex booth will also have the opportunity to explore the new additives sample rack, designed to help customers navigate the allnex additives portfolio. The sample rack can be ordered both via the allnex [website](#) and directly at the event by scanning the QR code available at the booth.

See how the new additives sample rack enables customers to:

- **Explore** our broad portfolio of innovative additives
- **Learn** how they perform in their formulation
- **Benefit** from our expertise

The allnex Mexico team warmly welcomes visitors to the allnex booth and looks forward to engaging conversations, and connections. Inspired by the region's natural beauty, this year's booth design invites visitors not only to explore innovative technologies and solutions, but also to enjoy an atmosphere that reflects the surrounding landscape and spirit.

See you at our booth 10-15, join us!
