

allnex Launches Public PCF Data for the Products in EMEA

RELEASE DATE:

Frankfurt am Main / November 3, 2025

- PCF data is publicly available for the EMEA product portfolio
- Customers and partners can use the data to make informed sustainability decisions
- Figures are continuously updated and aligned with industry standards
- This initiative is part of allnex's broad sustainability strategy

allnex today announced that Product Carbon Footprint (PCF) data for the majority of its EMEA product portfolio is now publicly available. This marks a major step towards full transparency across the value chain and reflects the company's commitment to support customers in making informed, data-driven sustainability choices.

The PCF data is accessible for all products without firewalls or login restrictions. By making this information open and continuously updated, allnex supports customers, suppliers, and partners in driving measurable progress toward decarbonization goals.

*"Transparency is the foundation for real climate action," said **Cedric D'Hulst**, Marketing Director EMEA. "By publishing PCF data for our products, we are making it easier for customers to quantify their own footprint and accelerate joint progress across the coatings value chain. This is not a one-time release — it's a living dataset that will evolve as upstream data and methodologies improve."*

The PCF figures are calculated according to industry standards and reflect cradle-to-gate emissions (Scope 1, 2, and upstream Scope 3). The data will be continuously refined as allnex receives more accurate inputs from suppliers and value chain partners, ensuring ongoing improvement. Our PCF numbers are calculated in accordance with the Together for Sustainability (TfS) guidelines, which align with ISO 14067 and the GHG Protocol.

*"Reliable carbon data is no longer optional — it's critical in the collaboration with our customers," added **Davy De Clercq**, Director Global Sustainability. "We have implemented fully automated PCF calculations, enabling us to update our numbers quickly and efficiently. The emission reduction efforts that allnex is putting in place, combined with improved PCF data quality from our suppliers, will lead to more accurate and reliable PCFs going forward. We view this as an open journey — shared with our partners, not guarded behind walls."*

allnex is a leading global manufacturer and solution provider of coating resins and additives for industrial and composite markets. With a 75-year heritage, over €2.2 billion in revenue and 4,000 employees worldwide, our focus is to create innovative chemistry for all nex>t generations, driven by the needs of our customers in a fast-changing world. We do this with sales, research and production network spanning 35 countries, a workforce representing over 50 nations with an all-in dedication to innovation, sustainability and reliable partnership.

allnex supports customers to enhance their product and service solutions with a wide range of chemistries and innovative products, including the sustainable ECOWISE™ offerings. As part of PTT Global Chemical (PTTGC), our main markets are Mobility & Transportation, Packaging & Consumer Goods and Construction & Infrastructure.
