

ALLNEX CERTIFICATES

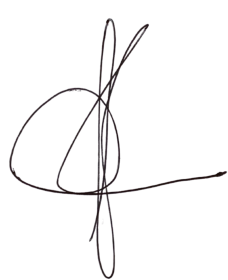

ENERGY POLICY

Ensuring efficient and environmentally sustainable energy use is a vital part of allnex's strategy. In support of this corporate goal, we have implemented a comprehensive, ISO-certified energy management system.

Our commitment regarding energy includes:

- Raising energy awareness among employees and other stakeholders
- Strict monitoring of our energy consumption
- Systematically implementing continual improvement projects to achieve our strategic and operational objectives
- Favor the transition to the use of energy from renewable sources
- Develop innovative products and processes with improved efficiency in their life-cycle
- Considering energy efficiency in the selection of equipment and services to support our energy performance targets
- Complying with any applicable legal and other requirements

The drive for a sustainable use of energy is an integral part of how we do business.
