

# allnex to Showcase Advanced Composite Solutions at JEC World 2026

## RELEASE DATE:

Frankfurt am Main / February 16, 2026

- allnex to present innovative and unique solutions for gelcoats, vinyl esters, UV curable composites and phenolic resins at JEC World 2026
- Innovative composites solutions are designed to advance performance across marine, pools and sanitary, transportation, CIPP and more

**allnex announces its participation in JEC World 2026, taking place March 10-12 at Paris-Nord Villepinte, France. Visitors are warmly invited to Booth 6-E81 to explore a wide range of innovative, application-focused composite solutions developed to support manufacturers in achieving superior performance, efficiency, and sustainability.**

What visitors will discover:

- **VIAPAL® Gelcoats and Barrier Coats:** Engineered specifically for marine and pool applications, these high-performance materials are designed to deliver long-term durability, UV resistance, and a superior surface finish, offering customers a reliable pathway to long-lasting, visually appealing composite products.
- **Newest Vinyl Ester Grades:** We are launching our new VIAPAL® vinyl ester grades, specifically engineered to deliver exceptional chemical resistance. These next-generation resins support customers who require robust formulations capable of withstanding harsh environments while maintaining structural integrity and longevity.
- **Revolutionary Styrene-Free Gelcoat for RVs, Buses, and Trucks:** This next-generation styrene-free gelcoat technology delivers outstanding durability and weather resistance. It is optimized for exterior components of RVs, buses, and trucks, providing long-lasting protection and a high-quality finish even under harsh conditions.
- **UV-Cured Composites with RAYLOK® C Grades:** The newest RAYLOK® C grades introduce a solution for UV-curable composites by combining fast curing, zero-VOC performance, and reduced waste. These grades are optimized for improved processability and high-throughput manufacturing.

allnex is a leading global manufacturer of industrial coating resins and additives. With a 75-year heritage, over €2.2 billion in revenue and 4,000 employees worldwide, our focus is to create innovative chemistry for all nex>t generations, driven by the needs of our customers and a swiftly changing world. We do this with a research and production network spanning 35 countries, a workforce representing over 50 nations and an all-in dedication to innovation, sustainability and reliable partnership.

Beyond a wide range of industry classics, allnex is known for its leading role in new chemistries such as UV-curable and low-bake resins, as well as for its sustainable ECOWISE™ line. As part of PTT Global, our main markets are Mobility and Transportation, Packaging and Consumer Goods and Construction & Infrastructure. In addition to tailor-made solutions for coatings, we offer an advanced portfolio of resins for composites.

- **Live Demonstration of UV-Curable Composite Technology -**  
Throughout the exhibition, senior lab technician Carmen Van Vaerenbergh will present live demonstrations showcasing the technology behind UV-curable composites, offering attendees an opportunity to see these advanced materials in operation.

This year, allnex will co-exhibit with partner company **GC**, who will highlight how their advanced material products deliver exceptional performance across a wide range of high-performance plastics and composite formats, offering visitors a broader view of integrated, future-ready material solutions.

All visitors are warmly welcomed to visit our stand, explore these innovations, and engage with the experts driving their development. Our experts look forward to supporting customers in achieving new levels of performance, efficiency, and sustainability in composite manufacturing.
